Accurate diagnosis and treatment of stallion reproductive problems can prevent substantial financial losses due to unsuccessful breeding.

The UF Large Animal Reproduction Service works with you to set financial and time-sensitive goals in order to maximize the potential of your mares and stallions without over-extending you or your budget.

To schedule an appointment or a phone consultation, call 352-392-2229.
Dr. Malgorzata Pozor is one of three board-certified veterinary reproduction specialists at UF with a focus in stallion reproduction. Dr. Pozor has more than 25 years of experience in stallion reproduction and her clinical research includes applications of imaging techniques in diagnosis of reproductive pathologies in stallions, medical modifications of testicular function in stallions, diagnosis and treatment of ejaculatory problems and more.

UF Reproduction Facilities

NOTICE TO FLORIDA HORSE OWNERS: Eastern Equine Encephalitis (EEE) has been detected in Alachua County recently. The current hot, humid conditions are very conducive to EEE infection because they support the development of abundant
mosquito population.

Read the facts about EEE for horse owners >>
